Mobilisation of Forest Bioenergy in the Boreal and Temperate Biomes: Challenges, Opportunities and Case Studies

Mobilisation of Forest Bioenergy in the Boreal and Temperate Biomes: Challenges, Opportunities and Case Studies

Mobilisation of Forest Bioenergy in the Boreal and Temperate Biomes: Challenges, Opportunities, and Case Studies features input from key international experts who identify and analyze the main opportunities and roadblocks for the implementation of sustainable forest biomass supply chains in the boreal and temperate regions. It draws from responses to surveys that were sent to specialists from different countries, compares models of bioenergy deployment, and discusses different types of bioenergy carriers.

Efficiency and profitability of the supply chain are analyzed and the scale and level of confidence of feedstock inventory estimates are highlighted. Logistics and ecological and socio-economic footprints are also covered. This book provides a synthesis of the scientific and technical literature on specific aspects of forest biomass supply chains, and quantifies future potentials in comparison to estimates provided by other sources and the targets for bioenergy production set by various organizations (IEA, IPCC, etc.).

Finally, the book proposes recommendations for practitioners, policymakers, and future research. This approach makes the book especially relevant for professionals, policymakers, researchers, and graduate students in the field of bioenergy conversion and management, as well as those interested in sustainable management of natural resources.

- Presents foundational theory, examples and lessons learned, drawing on scientific and technical literature, as well as surveys conducted among stakeholders from various countries of the boreal and temperate biomes
- Provides best practices, insights, and recommendations through an integrative framework that encompasses various aspects of forest biomass supply chain, at different scales, and looking at a broad geographical and geopolitical range
- Compares contrasting history, policy context, and level of forest bioenergy development in several countries through several case studies
- Analyzes the efficiency and profitability of the supply chain, highlighting the scale and level of confidence of feedstock inventory estimates

From reader reviews:

Robert Heck:

The e-book with title Mobilisation of Forest Bioenergy in the Boreal and Temperate Biomes: Challenges, Opportunities and Case Studies includes a lot of information that you can understand it. You can get a lot of gain after read this book. That book exist new information the information that exist in this publication represented the condition of the world now. That is important to you to find out how the improvement of the world. This book will bring you inside new era of the internationalization. You can read the e-book in your smart phone, so you can read the idea anywhere you want.

Breanne Gardner:

Your reading 6th sense will not betray an individual, why because this Mobilisation of Forest Bioenergy in the Boreal and Temperate Biomes: Challenges, Opportunities and Case Studies reserve written by well-known writer whose to say well how to make book which might be understand by anyone who also read the book. Written with good manner for you, still dripping wet every ideas and writing skill only for eliminate your own personal hunger then you still doubt Mobilisation of Forest Bioenergy in the Boreal and Temperate Biomes: Challenges, Opportunities and Case Studies as good book not simply by the cover but also by the content. This is one guide that can break don't ascertain book by its cover, so do you still needing one more sixth sense to pick that!? Oh come on your studying sixth sense already alerted you so why you have to listening to another sixth sense.

Irene Navarro:

Reading a book being new life style in this year; every people loves to examine a book. When you study a book you can get a lot of benefit. When you read publications, you can improve your knowledge, simply because book has a lot of information on it. The information that you will get depend on what kinds of book that you have read. If you wish to get information about your review, you can read education books, but if you want to entertain yourself read a fiction books, these kinds of us novel, comics, along with soon. The Mobilisation of Forest Bioenergy in the Boreal and Temperate Biomes: Challenges, Opportunities and Case Studies provide you with a new experience in studying a book.

Stephen Stansbury:

Do you like reading a e-book? Confuse to looking for your preferred book? Or your book had been rare? Why so many concern for the book? But any kind of people feel that they enjoy to get reading. Some people likes looking at, not only science book but additionally novel and Mobilisation of Forest Bioenergy in the Boreal and Temperate Biomes: Challenges, Opportunities and Case Studies or maybe others sources were given understanding for you. After you know how the truly great a book, you feel would like to read more and more. Science book was created for teacher or students especially. Those books are helping them to add their knowledge. In additional case, beside science publication, any other book likes Mobilisation of Forest

Bioenergy in the Boreal and Temperate Biomes: Challenges, Opportunities and Case Studies to make your spare time more colorful. Many types of book like here.
