Mothers and Daughters of Invention: Notes for a Revised History of Technology

Autumn Stanley

Mothers and Daughters of Invention: Notes for a Revised History of Technology Autumn Stanley

Written in an engaging and accessible style, this first broadly focused compensatory history of technology not only includes women's contributions but begins the long-overdue task of redefining *technology* and *significant technology* and to value these contributions correctly. Stanley traces women's inventions in five vital areas of technology worldwide--agriculture, medicine, reproduction, machines, and computers--from prehistory (or origin) forward, profiling hundreds of women, both famous and obscure. The author does not ignore theory. She contributes a paradigm for male takeovers of technologies originated by women.
