Biologically Inspired Cognitive Architectures (BICA) for Young Scientists: Proceedings of the First International Early Research Career Enhancement School ... in Intelligent Systems and Computing)
This book presents cutting-edge research focused on current challenges towards the realization of Biologically Inspired intelligent agents, or Cognitive Architectures (BICA). The chapters are written by both world-recognized experts (including Antonio Chella, Olivier Georgeon, Oliver Kutz, Antonio Lieto, David Vernon, Paul Verschure, and others) and young researchers. Together, they constitute a good mixture of new findings with tutorial-based reviews and position papers, all presented at the First International Early Research Career Enhancement School on Biologically Inspired Cognitive Architectures (FIERCES on BICA 2016), held April 21-24 in Moscow, Russia. Most works included here cross boundaries between disciplines: from neuroscience to social science, from cognitive science to robotics, and from bioengineering to artificial intelligence. A special emphasis is given to novel solutions to urgent problems that have been resisting traditional approaches for decades. Intended for providing readers with an update on biologically inspired approaches towards the computational replication of all the essential aspects of the human mind (the BICA Challenge), this book is expected to foster lively discussions on the topic and stimulate cross-disciplinary, cross-generation and cross-cultural collaboration.

From reader reviews:

Beverly Bell:

In this period globalization it is important to someone to get information. The information will make a professional understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of referrals to get information example: internet, classifieds, book, and soon. You can observe that now, a lot of publisher in which print many kinds of book. The book that recommended for your requirements is Biologically Inspired Cognitive Architectures (BICA) for Young Scientists: Proceedings of the First International Early Research Career Enhancement School ... in Intelligent Systems and Computing) this publication consist a lot of the information from the condition of this world now. This kind of book was represented how does the world has grown up. The vocabulary styles that writer use for explain it is easy to understand. Typically the writer made some study when he makes this book. Here is why this book suited all of you.

Michelle Oquinn:

Beside this kind of Biologically Inspired Cognitive Architectures (BICA) for Young Scientists: Proceedings of the First International Early Research Career Enhancement School ... in Intelligent Systems and Computing) in your phone, it can give you a way to get more close to the new knowledge or information. The information and the knowledge you might got here is fresh from oven so don't end up being worry if you feel like an outdated people live in narrow town. It is good thing to have Biologically Inspired Cognitive Architectures (BICA) for Young Scientists: Proceedings of the First International Early Research Career Enhancement School ... in Intelligent Systems and Computing) because this book offers to you readable information. Do you occasionally have book but you seldom get what it's exactly about. Oh come on, that would not happen if you have this in your hand. The Enjoyable set up here cannot be questionable, such as treasuring beautiful island. Use you still want to miss the idea? Find this book in addition to read it from today!

Sandra Wright:

That guide can make you to feel relax. This book Biologically Inspired Cognitive Architectures (BICA) for Young Scientists: Proceedings of the First International Early Research Career Enhancement School ... in Intelligent Systems and Computing) was multi-colored and of course has pictures around. As we know that book Biologically Inspired Cognitive Architectures (BICA) for Young Scientists: Proceedings of the First International Early Research Career Enhancement School ... in Intelligent Systems and Computing) has many kinds or variety. Start from kids until teenagers. For example Naruto or Private investigator Conan you can read and feel that you are the character on there. Therefore , not at all of book are usually make you bored, any it offers you feel happy, fun and relax. Try to choose the best book for you personally and try to like reading that will.

Nathaniel Mitchell:

Publication is one of source of knowledge. We can add our information from it. Not only for students but also native or citizen want book to know the revise information of year to help year. As we know those publications have many advantages. Beside most of us add our knowledge, may also bring us to around the world. By book Biologically Inspired Cognitive Architectures (BICA) for Young Scientists: Proceedings of the First International Early Research Career Enhancement School ... in Intelligent Systems and Computing) we can get more advantage. Don't you to be creative people? To be creative person must choose to read a book. Only choose the best book that suited with your aim. Don't end up being doubt to change your life with that book Biologically Inspired Cognitive Architectures (BICA) for Young Scientists: Proceedings of the First International Early Research Career Enhancement School ... in Intelligent Systems and Computing). You can more pleasing than now.
