Principle of Logic Thinking Automaton Shilong Wu

The logic thinking automaton is designed based on the theory of concept algebra^{<1>}. As we know the concept is the least element of logic thinking. The relationship among the concepts is the main goal of logic research. It also is the subject of concept algebra. According to the principle of concept algebra, the relationship of concepts can be calculated. The logical results can be calculated from known relationship of concepts through solving the concept equation. This ability make the logic thinking be not rely to the logic laws, because the logic result can be calculated in concept algebra, so that the logic thinking can be calculated, and the logic thinking also can be automation.

There are three chapters in this article. The chapter first explains the principle of the logic thinking automaton; the chapter second is to explain the proposition kinds that are used on automation. The chapter third is to tell readers how to use the automaton. The readers can get automaton on web side www.logicthinking.net or www.67sv.com (click here or <http://www.logicthinking.net/down/class/>).
