Harry M. Markowitz

**Risk-Return Analysis, Volume 2: The Theory and Practice of Rational Investing** Harry M. Markowitz  
*The Nobel Prize-winning Father of Modern Portfolio Theory returns with new insights on his classic work to help you build a lasting portfolio today*

Contemporary investing as we know it would not exist without these two words: “Portfolio selection.” Though it may not seem revolutionary today, the concept of examining and purchasing many diverse stocks?creating a portfolio?changed the face of finance when Harry M. Markowitz devised the idea in 1952.<?xml:namespace prefix = "o" ns = "urn:schemas-microsoft-com:office:office" />

In the past six decades, Markowitz has risen to international acclaim as the father of Modern Portfolio Theory (MPT), with his evaluation of the impact of asset risk, diversification, and correlation in the risk-return tradeoff. In defending the idea that portfolio risk was essential to strategic asset growth, he showed the world how to invest for the long-run in the face of any economy.

In *Risk Return Analysis*, this groundbreaking four-book series, the legendary economist and Nobel Laureate returns to revisit his masterpiece theory, discuss its developments, and prove its vitality in the ever-changing global economy. Volume 2 picks up where the first volume left off, with Markowitz’s personal reflections and current strategies. In this volume, Markowitz focuses on the relationship between single-period choices?now?and longer run goals. He discusses dynamic systems and models, the asset allocation “glide-path,” inter-generational investment needs, and financial decision support systems.

Written with both the academic and the practitioner in mind, this richly illustrated volume provides investors, economists, and financial advisors with a refined look at MPT, highlighting the rational decision-making and probability beliefs that are essential to creating and maintaining a successful portfolio today.

#### **Leona Tidwell:**

As a student, I exactly feel bored with reading. If their teacher asked them to go to the library in order to make a summary for some e-book, they are complained. Just small students that have reading's internal or real their interest. They just do what the teacher wants, like asked to go to the library. They go to at this time there but nothing reading significantly. Any student feels that looking at is not important, boring and can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever we would like. Likewise, word says, many ways to reach Chinese's country. Therefore, this Risk-Return Analysis, Volume 2: The Theory and Practice of Rational Investing can make you feel more interested to read.
