With all of the hazards surrounding the food and drug industry, maintaining solid records and complying with regulations is more important than ever. Unfortunately, given all of the constant investigative changes and new laws coming out of the courts, it is easy for companies to get lost and fall behind on what they need to keep up with. As their attorney, it is your job to make sure they know what to expect, and how to overcome whatever challenges are thrown their way. *Recent Developments in Food and Drug Law* provides you with an authoritative, insider's perspective on helping clients navigate and comply with guidance changes in manufacturing and labeling practices. Inside, you will find experienced partners from nationwide law firms discussing common FDA violations, including failure to have written procedures and train employees, and outlining the parts of an investigation, including triggers and future avoidance. These lawyers offer you advice on increasing client focus on manufacturing practices, encouraging pharmaceutical companies to develop take back programs for their jurisdictions, and assisting clients in registering as outsourcing facilities. From understanding the Food Safety Modernization Act to overcoming pharmacy compliance issues, these authors stress the importance of educating your clients on reevaluating food safety plans, and divulge best practices for helping clients appropriately label products based on intended use. This book also discusses why your clients should include provisions in manufacturing contracts to ensure that suppliers are liable in the event of compliance failures, and offers advice on developing inspection compliance and response practices.
