“I had no idea I wasn't ovulating and when I started seeing that my temps weren't following a pattern, I broached the subject with my gynecologist, who then did an ultrasound and found that I had PCOS. If it weren't for charting it would have taken me a long time to realize there was a serious problem.”

“Knowing when I ovulate has been eye-opening for me. I feel much more in control of the trying to conceive process with this information.”

“I love charting! I feel like I am actually doing something to help us get pregnant when so much of it is out of my control. I have learned so much about how my body works and what is going on with me from charting.”

“WOW, this experience charting my fertility signs has helped me in so many ways. Not only am I more aware of what my body is telling me, but I have a sense of control over an uncertain time...”

“Charting taught me a tremendous amount about me and my body and how it works. It gave me hope when I needed it and it helped me communicate in a much more detailed way with my doctor.”

“I love knowing what my body is doing and why, and it made me much more confident and knowledgeable when talking with my OB.”

“Charting gave me such an insight into my cycle - before I was just flying blind. Without charting I don't think that I would be 6 months pregnant now.”
