## **Logistics Systems for Sustainable Cities: Proceedings of the 3rd International Conference on City Logistics (Madeira, Portugal, 25-27 June, 2003)**

This book, Logistics Systems for Sustainable Cities, is an outcome of the Third International Conference on City Logistics (City Logistics III held in Madeira in 2003) organised by the Institute for City Logistics ([www.citylogistics.org](http://www.citylogistics.org)). It includes recent developments in the modelling, evaluation and planning of city logistics schemes. Since city logistics measures have already been implemented in several cities, a review of the performance of these innovative schemes is presented. As well, an overview of the visions for city logistics and public private partnerships for city logistics is given. A summary of the OECD report, Delivering the Goods ? 21st Century Challenges for Urban Goods Transport, is included. Recent developments in e-Commerce and e-Logistics are covered.
