Solving Numerical PDEs: Problems, Applications, Exercises (UNITEXT / La Matematica per il 3+2)

Luca Formaggia, Fausto Saleri, Alessandro Veneziani

This book stems from the long standing teaching experience of the authors in the courses on Numerical Methods in Engineering and Numerical Methods for Partial Differential Equations given to undergraduate and graduate students of Politecnico di Milano (Italy), EPFL Lausanne (Switzerland), University of Bergamo (Italy) and Emory University (Atlanta, USA). It aims at introducing students to the numerical approximation of Partial Differential Equations (PDEs). One of the difficulties of this subject is to identify the right trade-off between theoretical concepts and their actual use in practice. With this collection of examples and exercises we try to address this issue by illustrating "academic" examples which focus on basic concepts of Numerical Analysis as well as problems derived from practical application which the student is encouraged to formalize in terms of PDEs, analyze and solve. The latter examples are derived from the experience of the authors in research project developed in collaboration with scientists of different fields (biology, medicine, etc) and industry. We wanted this book to be useful both to readers more interested in the theoretical aspects and those more concerned with the numerical implementation.

From reader reviews:

Woodrow Harker:

The particular book Solving Numerical PDEs: Problems, Applications, Exercises (UNITEXT / La Matematica per il 3+2) has a lot of knowledge on it. So when you make sure to read this book you can get a lot of profit. The book was authored by the very famous author. Tom makes some research before write this book. That book very easy to read you will get the point easily after reading this article book.

Mary Haskell:

Don't be worry if you are afraid that this book may filled the space in your house, you can have it in e-book means, more simple and reachable. This kind of Solving Numerical PDEs: Problems, Applications, Exercises (UNITEXT / La Matematica per il 3+2) can give you a lot of buddies because by you investigating this one book you have issue that they don't and make a person more like an interesting person. That book can be one of a step for you to get success. This publication offer you information that might be your friend doesn't understand, by knowing more than different make you to be great persons. So , why hesitate? Let me have Solving Numerical PDEs: Problems, Applications, Exercises (UNITEXT / La Matematica per il 3+2).

John Edwards:

That reserve can make you to feel relax. This particular book Solving Numerical PDEs: Problems, Applications, Exercises (UNITEXT / La Matematica per il 3+2) was multi-colored and of course has pictures around. As we know that book Solving Numerical PDEs: Problems, Applications, Exercises (UNITEXT / La Matematica per il 3+2) has many kinds or type. Start from kids until young adults. For example Naruto or Detective Conan you can read and believe you are the character on there. Therefore , not at all of book are usually make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book for you personally and try to like reading this.

Latoya Palos:

Many people said that they feel bored when they reading a book. They are directly felt that when they get a half parts of the book. You can choose typically the book Solving Numerical PDEs: Problems, Applications, Exercises (UNITEXT / La Matematica per il 3+2) to make your reading is interesting. Your own personal skill of reading proficiency is developing when you such as reading. Try to choose very simple book to make you enjoy to study it and mingle the feeling about book and studying especially. It is to be initial opinion for you to like to open a book and examine it. Beside that the guide Solving Numerical PDEs: Problems, Applications, Exercises (UNITEXT / La Matematica per il 3+2) can to be a newly purchased friend when you're feel alone and confuse in what must you're doing of this time.
