The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness

Gilberto Levy, Bruce Levin

The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness Gilberto Levy, Bruce Levin

A practical and clarifying approach to aging and aging-related diseases

Providing a thorough and extensive theoretical framework, *The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness* addresses the surprisingly subtlety—with consequential biomedical and public health relevance—of what it means for a condition to be related to aging. In this pursuit, the book presents a new quantitative method to examine the relative contributions of genetic and environmental factors to mortality and disease incidence in a population.

With input from evolutionary biology, population genetics, demography, and epidemiology, this medically motivated book describes an index of aging-relatedness and also features:

- Original results on the asymptotic behavior of the minimum of time-to-event random variables, which extends those of the classical statistical theory of extreme values
- A comprehensive and satisfactory explanation based on biological principles of the Gompertz pattern of mortality in human populations
- The development of an evolution-based model of causation relevant to mortality and aging-related diseases of complex etiology
- An explanation of how and why the description of human mortality by the Gompertz distribution can be improved upon from first principles
- The amply illustrated analysis of real-world data, including a program for conducting the analysis written in the freely available R statistical software
- Technical appendices including mathematical material as well as an extensive and multidisciplinary bibliography on aging and aging-related diseases

The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness is an excellent resource for practitioners and researchers with an interest in aging and aging-related diseases from the fields of medicine, biology, gerontology, biostatistics, epidemiology, demography, and public health.

From reader reviews:

Ryan Neal:

Your reading sixth sense will not betray an individual, why because this The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness reserve written by well-known writer we are excited for well how to make book which might be understand by anyone who else read the book. Written within good manner for you, leaking every ideas and composing skill only for eliminate your hunger then you still hesitation The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness as good book not merely by the cover but also by the content. This is one guide that can break don't ascertain book by its include, so do you still needing another sixth sense to pick this!? Oh come on your studying sixth sense already said so why you have to listening to one more sixth sense.

Wm Schroeder:

Are you kind of active person, only have 10 or maybe 15 minute in your day time to upgrading your mind expertise or thinking skill perhaps analytical thinking? Then you are experiencing problem with the book compared to can satisfy your limited time to read it because all of this time you only find e-book that need more time to be examine. The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness can be your answer because it can be read by anyone who have those short free time problems.

Lisa Bentley:

Many people spending their period by playing outside together with friends, fun activity using family or just watching TV 24 hours a day. You can have new activity to spend your whole day by reading a book. Ugh, do you consider reading a book can definitely hard because you have to bring the book everywhere? It alright you can have the e-book, having everywhere you want in your Cell phone. Like The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness which is getting the e-book version. So , try out this book? Let's see.

Dorothy Saunders:

Reading a reserve make you to get more knowledge from this. You can take knowledge and information from the book. Book is published or printed or outlined from each source that filled update of news. On this modern era like today, many ways to get information are available for you. From media social just like newspaper, magazines, science e-book, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Do you want to spend your spare time to open your book? Or just seeking the The Biostatistics of Aging: From Gompertzian Mortality to an Index of Aging-Relatedness when you needed it?
