China's enormous size, vast population, abundant natural resources, robust economy, and modern military suggest that it will emerge as a great world power. *Inside China's Grand Strategy: The Perspective from the People's Republic* offers unique insights from a prominent Chinese scholar about the country's geopolitical ambitions and strategic thinking.

Ye Zicheng, professor of political science in the School of International Studies at Peking University, examines China's interactions with current world powers as well as its policies toward neighboring countries. Despite claims that repressive domestic policies and an economic slowdown are evidence that the country's efforts toward modernization will fail, Ye points to China's inclusion in the G-20 as an indicator of success. Ye compares China's global ascension, particularly its emphasis on peace, to the historical experiences of rising European superpowers, providing an insider look at a country poised to become an increasingly prominent international power.
